

UNITIZED
FAÇADE SYSTEM

ETEM

EASY INSTALLATION WITHOUT SCAFFOLDING

DETAILS

Various types of materials

Big variety of cladding solutions

90 mm system width

20 mm gap between modules, allowing movement and deformations up to 14 mm

High quality, factory - produced modules

Nearly 70% reduction in installation time

E90

UNITIZED
FAÇADE SYSTEM

DESIGN

DESIGNED ACCORDING TO THE HIGH
REQUIREMENTS FOR WIND LOAD

CUSTOM DESIGNED EPDM GASKETS

ADJUSTABILITY OF THE FIXING DEVICES

MAIN ADVANTAGES

Manufacturing not dependent on weather conditions

Glass panels from 23 up to 40 mm thickness

Controlled drainage of rain water and condensation

High level of water tightness with four levels

Compatible with all ETEM window systems
